1. ACCOUNTING POLICIES

Basis of preparing the financial statements
At the balance sheet date the company had net liabilities of £393,313 (2013 - £349,135). It is reliant on the continuing support of an associated company, Southeast Traders Ltd, to enable it to meet its financial commitments. These accounts have been prepared on the going concern basis on the assumption that this support will continue for the foreseeable future.

Accounting convention
The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover
Turnover represents the value of rents receivable and properties sold in the year, excluding value added tax.

Stocks
Work in progress is valued at lower of cost and net realisable value. Cost consists of direct materials, labour and attributable overheads. Net realisable value is based on estimated selling price, less further costs expected to be incurred to completion and disposal.

Profit is taken on long term contracts when their outcome has been foreseen with reasonable certainty. In determining the amount of profit taken at the year end, the main facts considered are the experience of similar contracts and the estimated stage of completion. Anticipated losses are provided in full.

Deferred tax
Deferred tax is provided at the average rates that are expected to apply when the timing differences reverse, based on current tax rates and laws. Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset. Deferred tax assets and liabilities are not discounted.
