Notes to the Abbreviated Accounts for the period ended 31 March 2015

1 Accounting Policies

Basis of measurement and preparation of accounts
The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities effective April 2008.

Turnover policy
Turnover represents the total invoice value, excluding value added tax, of sales made during the period and derives from the provision of goods falling within the company's ordinary activities

Tangible assets depreciation policy
Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life as follows:

Plant and machinery - 20% reducing balance

Other accounting policies
Stock

Stock is valued at the lower of cost and net realisable value.

Deferred Tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions:

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to that extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where , on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacements are sold;

Provision is made for deferred tax that would arise on the remittance of the retained earnings of overseas subsidiaries, associates and joint ventures only to the extent that, at the balance sheet date, dividends have been accrued as receivable;

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on a undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
