Notes to the Abbreviated Accounts
for the Year Ended 30th June 2012

1. ACCOUNTING POLICIES

Basis of preparing the financial statements
I confirm that in accordance with the Financial Reporting Council's recommendations that I have carried out a rigorous assessment of the company and have reached a view after that assessment that the company is entitled to be considered a going concern and that these accounts properly reflect that status as a basis for preparation of the accounts.

In completing my assessment, I have considered a period of time which is greater than 1 year from today's date.

Based upon my assessment, I consider that the disclosure in the accounts is balanced, proportionate and clear and reflects the facts as established during my assessment of the next twelve months.

Continuation as a going concern is dependent upon the continued support of the directors and they have confirmed that they will not withdraw such support.

Accounting convention
The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover
Turnover is the amount derived from the ordinary activities of the company, after trade discounts and excluding value added tax.

Goodwill
Goodwill, being the amount paid in connection with the acquisition of a business in 2009, is being amortised evenly over its estimated useful life of five years.

Tangible fixed assets
Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Plant and machinery etc - 25% on cost

Stocks
Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Deferred tax
Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Hire purchase and leasing commitments
Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is the shorter.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.
