CLIMPY WT LIMITED
NOTES TO THE ACCOUNTS
FOR THE YEAR ENDED 30 JUNE 2024

1 Statutory information

Climpy WT Limited is a private company, limited by shares, registered in Scotland, registration number SC395321. The registered office is 272 Bath Street, Glasgow, G2 4JR, Scotland.

2 Compliance with accounting standards

The accounts have been prepared in accordance with the provisions of FRS 102 Section 1A Small Entities. There were no material departures from that standard.

3 Accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below and have remained unchanged from the previous year, and also have been consistently applied within the same accounts.

Basis of preparation

The financial statements have been prepared on a going concern basis as the Directors believe there will be sufficient cash to continue operations for the foreseeable future.

Presentation currency

The accounts are presented in £ sterling.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes. Turnover includes revenue earned from the generation of electricity. Turnover from the generation of electricity is recognised when the electricity generated has been exported to the grid.

Tangible fixed assets

Tangible assets comprise directly attributable costs in acquiring assets including finance costs and professional fees where appropriate.

Individual fixed assets costing more than £1,000 are capitalised at cost.

Depreciation

Depreciation has been provided on a systematic basis in order to write off fixed assets over the estimated useful economic life of 20 years. The directors will also consider whether assets should be subject to an impairment review.

Debtors

Short term debtors are measured at transaction price (which is usually the invoice price), less any impairment losses for bad and doubtful debts. Loans and other financial assets are initially recognised at transaction price including any transaction costs and subsequently measured at amortised cost determined using the effective interest method, less any impairment losses for bad and doubtful debts.

Creditors

Short term creditors are measured at transaction price (which is usually the invoice price). Loans and other financial liabilities are initially recognised as transaction price net of any transaction costs and subsequently measured at amortised cost determined using the effective interest method.

FOR THE YEAR ENDED 30 JUNE 2024

Taxation

A current tax liability is recognised for the tax payable on the taxable profit of the current and past periods. A current tax asset is recognised in respect of a tax loss that can be carried back to recover tax paid in a previous period.

Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities, other future taxable profits or by way of group relief.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

Leased assets

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. All other leases are classified as operating leases. Operating lease payments are recognised as an expense on a straight-line basis over the lease term.

Expenses

Expenses are recognised in the Income Statement on an accruals basis in the period in which they are incurred.
