Notes to the Abbreviated Accounts
for the Year Ended 30 April 2015

1. ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The Directors considers it appropriate to prepare the financial statements on the going concern basis, in spite of the net liabilities position and reliance on the company's creditors for finance.

Should this support be withdrawn, the company may be unable to realise its assets and discharge its liabilities in the normal course of business, whilst adjustments would have to be made to reduce the value of assets to their recoverable amounts and to provide for any further liabilities which may arise.

Turnover

Turnover represents net sales of goods and services, excluding value added tax, and recognised when the company becomes entitled to the income.

Other intangible assets

Intangible assets are stated at cost less accumulated amortisation. Amortisation has been recognised during the year on a straight line basis over the economic useful life of two years. Amortisation is included within net operating expenses.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Computer equipment - 33% straight line

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed by the balance sheet date. Deferred tax is not recognised when assets are revalued unless, by the balance sheet date, the company has entered into a binding agreement to sell the assets and recognised the gains and losses expected to arise on sale or where assets have been sold and it is expected that the taxable gain will be rolled over into a replacement asset.

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.
