Notes to the Financial Statements
for the Year Ended 31 July 2016

1. **STATUTORY INFORMATION**

Roye Peters Motor Engineer Limited is a private company, limited by shares, registered in Scotland. The company's registered number and registered office address can be found on the Company Information page.

2. **ACCOUNTING POLICIES**

Basis of preparing the financial statements

These financial statements have been prepared in accordance with the provisions of Section 1A "Small Entities" of Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

The financial statements have been prepared on a going concern basis as the company is being supported in the short term through a loan provided by the director. This loan is interest free and will not be repaid until such time that the company has generated sufficient profits and funds to enable it to do so

Turnover and revenue recognition

Turnover is derived from motor engineering services supplied by the company.

Turnover is measured at the fair value of motor engineering services supplied, net of discounts and excluding value added tax, and is recognised at the point that the company obtains the right to consideration.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2012, is being amortised evenly over its estimated useful life of ten years.

Tangible fixed assets

Tangible fixed assets held for the companies own use are stated at cost less accumulated depreciation and accumulated impairment loss.

At each balance sheet date, the company reviews the carrying amounts of its tangible fixed assets to determine whether there is any indication that any items have suffered an impairment loss. If any such indication exists, the recoverable amount of an asset is estimated in order to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of the asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Expenditure of £1,000 or more on individual tangible fixed assets is capitalised at cost. Expenditure on assets below this threshold is charged directly to the profit and loss account in the period it is incurred.

Stocks

Stocks are stated at the lower of cost and estimated selling price less costs to complete and sell (net realisable value). Costs, which comprise direct production costs, are based on the method appropriate to the type of inventory class, but usually on a first-in-first-out basis. Overheads are charged to profit and loss as incurred. Net realisable value is based on the estimated selling price less any estimated completion or selling costs.

When stocks are sold, the carrying amount of those stocks is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of stocks to net realisable value and all losses of stocks are recognised as an expense in the period in which the write-down or loss occurs. The amount of any reversal of any write-down of stocks is recognised as a reduction in the amounts of stocks recognised as an expense in the period in which the reversal occurs.

2. **ACCOUNTING POLICIES - continued**

Taxation

Taxation represents the sum of tax currently payable and deferred tax.

The company's liability for current tax is calculated using the tax rates that were enacted during the reporting period.

Deferred tax is recognised at current tax rates in respect of all timing differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. A deferred tax asset is only recognised to the extent that future taxable profits are expected to reverse the underlying timing difference. Deferred tax balances are not discounted.

Hire purchase and leasing commitments

Rentals paid under operating leases are charged to profit or loss on a straight line basis over the period of the lease.
